

Email message:

Hi,

I hope all is well!

I have been an Industrial Engineer, Quality Engineer, and Consultant Engineer for the past three years in Puerto Rico. I have recently decided to move to Stanford, California, to look for a new challenge in the Data Science field, and I am reaching out to you to ask for your help with any leads or contacts.

I'm looking for an entry-level Data Analyst position at Stanford or San Francisco, ideally in the tech field. I am particularly interested in joining an agency but would also consider exciting in-housework.

If you know of any job opportunities or leads that you might be able to share with me, please send them my way. Below, I have included a list of my experience, my target positions, and my dream companies' list. I have also attached my resume for your reference, and feel free to pass it along.

Thanks in advance for your help! I hope you all are doing well and hope to catch up with you individually soon.

Work Experience

- **Industrial Engineer**, Boston Scientific: Improve the production line output through data analysis and present data-driven solutions for continued improvements.
- **Quality Engineer**, Medtronic: I served as the primary contact for Corrective Action Preventive Action (CAPA) Field Actions in the Caribbean islands.
- **Consultant Engineer**, Business Improvement & Marketing Solution: I provide Data Analysis insight to balance human resources and the clients' financial budget.

Position Seeking

- Data Analyst
- Business Analyst
- Data Scientist

Dream Companies

- Amazon, Palo Alto
- Google, San Francisco, or Mountain View
